

Gortemoller Engineering, Inc.

Land Development • Infrastructure • Transportation

Description of Project

GE served as the Prime Design Consultant providing professional engineering services in the way of design consultation and construction management for the installation of 1.49-mile bike lanes, drainage improvements, and resurfacing of Transmitter Road, Bay County, Florida. This project was a Design-Build through C.W. Roberts Contracting, Inc. Bike Lanes were added to both sides of Transmitter Road from SR 22 to SR 30A (US 98/ 15th Street). The project included environmental permitting assistance, limited drainage review, utility coordination, roadway widening/resurfacing and sign and pavement marking design.

TRANSMITTER ROAD (CR 2327) - BIKE LANES AND RESURFACING Panama City, Florida
