

Gortemoller Engineering, Inc.

Land Development • Infrastructure • Transportation

Description of Project

GE served as the Prime Design Consultant providing professional engineering services for the 3.3-mile Shared Use Path project in Wakulla County. This project was constructed with one adjacent connecting project as a “Goes With” project. Project highlights include full use of the right-of-way in order to get trail as far from US 98 as possible. There was significant effort to minimize impacts to significant trees within the alignment of the Shared Use Path. The design was revised in order to minimize impacts to St. Marks Powder operations.

Construction Cost: \$2,044,255
