

Gortemoller Engineering, Inc.

Land Development • Infrastructure • Transportation

Description of Project

GE served as the Prime Design Consultant providing professional engineering services for the 1.1-mile Shared Use Path along SR 30/61 (US 98) from Boykin Road to St. Frances Street in Wakulla County, Florida. This project was constructed with two adjacent connecting projects as a “Goes With” project. Project highlights include full use of the right-of-way in order to get the trail as far from US 98 as possible. There was significant effort to minimize impacts to significant trees within the alignment of the Shared Use Path as well as extensive coordination with the adjacent SR 61 intersection project including constructing the first 1400 linear feet within the intersection project.

Construction Cost: \$688,190

SR 30/61 (US 98) Coastal HWY

Shared Use Path from Boykin Road to St. Frances Street Wakulla County, Florida

Project Owner's Information:

FDOT District 3
Jimmy Smith, P.E. (GEC)
850-638-0250

Year Completed:

2015 – 2017 - Professional Services
2017 – 2019 - Construction

Firms involved with this Project:

- Gortemoller Engineering, Inc.
- Environmental and Geotechnical Specialists, Inc.
- Alday-Howell Engineering, Inc.
- Carpe Diem Community Solutions, Inc.
- Jacobs Engineering Group, Inc.
- Kennedy Engineering & Associates Group LLC
