

Gortemoller Engineering, Inc.

Land Development • Infrastructure • Transportation

Description of Project

Provided engineering review, existing condition modeling as well as analysis of alternative design recommendations to reduce or eliminate flooding along 12th Street. Prepared Construction Plans to upgrade the existing conveyance system - 12th Street to 9th Street - with approximately 2,325 LF of 42" pipe, supporting piping and additional drainage measures. Upgraded system provided for reduced flooding and increased safety within the area.

Construction Cost: \$600,000

12th Street Drainage Improvements from 12th Street to 9th Street Panama City, Florida

Project Owner's Information:

City of Panama City
Neil Fravel, P.E.
